Neville Harding

Senior Support / Developer

1962 Canso Rd #201

North Saanich, BC V8L 5V5

### **DEAR NEVILLE HARDING,**

My name's Mathew, and I'd like to help North Orca Technologies Inc with its flight training scheduling system as a junior software developer. I'm fresh in the field of software development, but I believe that with my previous experiences, I will make the right candidate for this job.

I am finishing my Computer Information Technology and will receive my diploma this spring. I have a robust coding and analytic background. Having the privilege of working for your company will increase my learning opportunities and give me the exposure I need to advance my career while using what I've already learned to make an impact on your clients.

After graduation, I hope to work for an agency like yours to grow my experience and become more advanced in software development. While at the same time, being able to work on a project that people will use daily. I believe I can achieve this goal with the right opportunities and experience working with a company like yours.

I previously had a school project in which a group and I were tasked with creating a nutrition-tracking website for a client. During this project, I was allowed to learn project design and development. These opportunities included learning design, planning within scope, group management, customer support, development, debugging, and deployment. The work I contributed to this project primarily focused on the front and back end of the project. I believe that my design and development knowledge could be of interest to you, as I read that you're looking for experience in this area of work.

I would like the opportunity to meet with you to discuss the Junior software developer job opportunities you have available. Please let me know if you have any questions or would like to see specific work samples. You can reach me at (403) 353-2341 or by email at mathewp@lethbridgecollege.ca.

Thank you for your consideration.

Sincerely,  
Mathew Philp
